

Inspection Scheduling Codes

These are the 3-digit inspection codes used to schedule inspections through IVR, the City's automated inspection scheduling system. Call the IVR system at **425-452-6875** to schedule any of the listed inspections and when the system prompts you to do so, enter the 3-digit numeric code for the inspection you would like to schedule. Note: not all inspections in this list are required for the work you are doing. Refer to your permit for a list of required inspections.
